The screenshot displays the Voice Analytics web interface. At the top, a blue header bar shows the user's name 'Hi Fabio Demarchi' and a maintenance notice: 'Programmed system maintenance at 02:00 AM CET. The service will not be available until 04:00 AM CET. [More informations](#)'. Below the header, there are filters for 'All time' and 'All recordings', a search bar for 'keyword or phrase', and a 'MORE FILTERS' button. The main content area shows a table of recordings with 5 results. The table has columns for 'Dir', 'From', 'To', 'Date', 'Processing', 'Tags', and 'Delete'. The first row is highlighted in blue and shows a recording from 'n.a.' to 'Fabio Demarchi' with a positive sentiment icon. The other four rows show recordings from '+39 3491234567' to 'Fabio Demarchi' with positive sentiment icons. The last row shows a recording from 'Fabio Demarchi' to '+39 3491234567' with a negative sentiment icon. A sidebar on the left contains icons for home, search, settings, and user profile.

| Dir | From | To | Date | Processing | Tags | Delete |
|------|----------------|----------------|------------------------|------------|------|--------|

Transcripts and Sentiment Analysis with Rich player.

- The recording is **transcribed into text**, keeping local/remote party separated.
- You can replay **the whole recording** or just **the single participant leg**.
- Voice Analytics automatically evaluates the **mood of both parties** and shows relevant emoticons at overall and single sentence level.
- You can add keywords/sentences **tags** to each recording, to quickly identify multiple recordings including same tags.

The screenshot displays the Imagicle interface for a recording titled "Fabio Demarchi". The interface includes a sidebar with navigation icons, a main player area, and a right-hand panel with additional information.

SPEAKERS SENTIMENT
Average sentiment of the single speaker, giving the possibility to rapidly understand, for example, if the customer was angry while the agent wasn't.

OVERALL SENTIMENT
Average calculation on the entire conversation's mood

Overall sentiment: Positive 80%

Tags: New contract, SMS campaign, Great script adherence

Comments: Comment from external source Last edit by: Fabio Demarchi. Can find thousands of other places to download from -check out our tips below to help you find out where.

GO TO → 00:56

SINGLE SENTENCE SENTIMENT
Average calculation on a single call fragment's mood

The interface also shows a transcript of the recording, with speakers identified as "Fabio Demarchi", "Speaker 1", and "Speaker 2". The transcript includes the following text:

Fabio Demarchi 00:00
Are you one of the thousands of Iphone owners who has no idea that they can get free games for their Iphone?

Speaker 1 00:00
It's pretty cool to download things from Itunes, but with a little research you can find thousands of other places to download from -check out our tips below to help you find out where.

A cooperative credit unions.

Cloud compliance Call Recording only for PSTN calls.

Who

A cooperative built by credit unions - providing services & solutions so CUs can focus on their communities

- 250+ employees
- CUCM on-prem

Challenges

- Moving Webex Calling
- Respect privacy and be compliant with data security regulations
- Record **ONLY PSTN** calls

Solution

- Imagicle Cloud Call Recording to record calls and provide analytics with transcription, sentiment analysis, and reporting

Results

- 100% PSTN voice inbound/outbound calls recorded
- Unlimited storage from the Imagicle Cloud with no additional costs
- Users love the easy access to their recording directly from Webex

Imagicle vs Dubber

QUICK COMPARISON

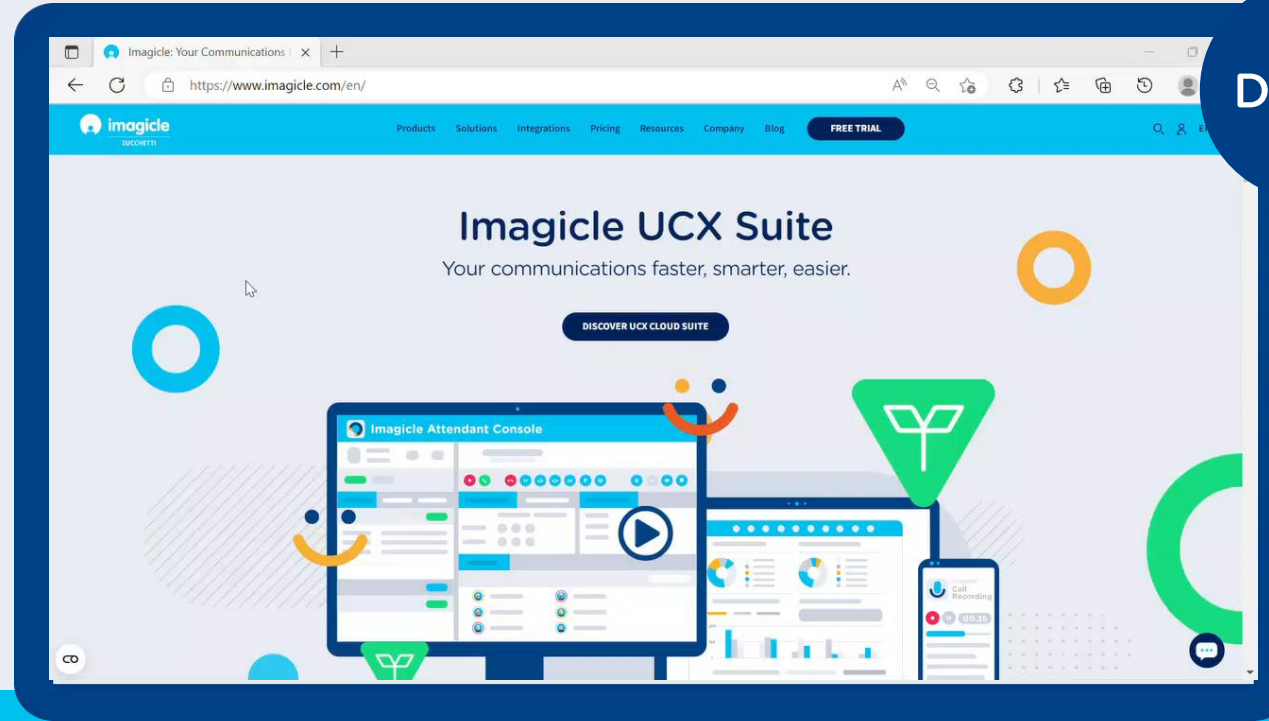

Imagicle Compliance Recording **is the most flexible solution** in market with an offer based on Call Recording foundation plus **Screen Recording** add-on, available **Cloud** or **On Premises**.

Voice Analytics is a Cloud add-on to provide **rich transcription** and **sentiment analysis**.

Imagicle can be licensed **per user** or **per channel**, more competitive when a lot of users need to record few calls.

FAQ about Cisco Customers Support

Q: If a customer/partner doesn't have an account to open a ticket, does he/she have just to register on the website?

Exactly, Imagicle has provided all customers and partners with the possibility to register to the Support Portal in the easiest way possible. A few clicks and the Support Team will be ready to help you solve any issue you may have.

Q: Can Cisco Folks open a support ticket in case of an issue with the onboarding of a customer?

A: No, Imagicle Support Portal doesn't provide Cisco folks with a generic Cisco account.
Cisco Customers can follow the simple path described so far.

Q: In case the ticket is opened by the customers or by the partners, is there a way to update Cisco about the status?

A: The Support Portal does not send automatic notifications to Cisco but: Cisco customer can put Cisco folks in CC while replying to the e-mail threads previously opened or Cisco can send an e-mail to support@imagicle.com specifying Customer Name, Product , License Type

Let's kickoff a free POC

1

REQUEST A POC

1. Follow the link above. click on the “**GET STARTED**” button. You’ll be redirected to a landing page where you have to select “Activate a trial” and enter your data.
2. You’ll be provided with instructions to **authorize** Imagicle applications
3. You will then receive the instructions to access your instance
4. You can start testing your Call Recording.

Once the PoC is proven to be successful, your Call Recording will automatically go into production after the purchase order!

The Imagicle Team is ready to help you: email us at presales@imagicle.com or join the Ask Imagicle Webex Room at this link: <https://eurl.io/#PyG36AcVX>
